## Summary

Senior Product Designer with 8.5+ years of experience designing consumer products that transform complex, data-rich information into intuitive experiences across web, iOS, and Android. I thrive in ambiguous, fast-moving environments, partnering closely with product and engineering to shape strategy, rapidly iterate, and ship thoughtful solutions. My background spans outdoor recreation, mapping, accessibility, federal digital services, and AI-assisted product development, with a passion for building products that help people confidently navigate the world.

## Experience

### Peter Burr (Contract)

**Principal Experience Designer**, Remote | May 2026 - June 2026

- Lead the end-to-end design and development of an immersive mixed reality experience, translating complex concepts into intuitive spatial interactions.
- Serve as the primary experience design lead, partnering with stakeholders to define product vision, interaction models, and implementation strategy.
- Rapidly prototype and iterate using Unity, Blender, and AI-assisted workflows to accelerate concept development and production.
- Lead cross-functional collaboration across engineering, art, and production while mentoring a team of three interns from concept through exhibition launch.

**Technical Artist**, Missoula, Montana | January 2026 - May 2026

- Designed and prototyped immersive environments in Unity, shaping interactive experiences through rapid experimentation.
- Took ownership of creative and technical decisions across environment design, lighting, interactions, and scene composition.
- Leveraged AI tools to accelerate asset creation, worldbuilding, and prototyping.
- Collaborated closely with the artist to evolve concepts into cohesive, production-ready experiences.

### Ad Hoc, LLC

**Senior Product Designer**, Remote | November 2023 - July 2025

- Led end-to-end product design for complex federal digital services, transforming intricate workflows into intuitive, accessible experiences for hundreds of thousands of users.
- Partnered closely with product managers, engineers, researchers, and stakeholders to shape product strategy from discovery through implementation.
- Translated ambiguous requirements into clear design direction through user research, systems thinking, wireframes, prototypes, and iterative testing.
- Designed scalable solutions within enterprise design systems while maintaining a strong focus on accessibility, usability, and long-term maintainability.
- Converted complex paper-based workflows into an intuitive digital application for Veterans Affairs, replacing manual processes with a streamlined online experience.
- Led the end-to-end design of a digital pass management platform for the National Park Service, improving operational efficiency and modernizing internal workflows.
- Created systems diagrams and data journey maps for the Social Security Administration to clarify complex service ecosystems and support product decision-making.
- Synthesized user testing insights for Healthcare.gov, identifying usability improvements that informed future product enhancements.

## Roadpass Digital

**Product Designer**, Remote | December 2021 - June 2023

- Owned the end-to-end product design for Campendium, leading UX across web, iOS, and Android while partnering closely with product and engineering to shape the product roadmap.
- Designed intuitive experiences that helped campers discover destinations, evaluate options, and confidently plan trips using map-based and location-aware information.
- Partnered closely with product managers and engineers to rapidly iterate from discovery through launch, using customer feedback, usability testing, and product data to guide decisions.
- Delivered high-fidelity prototypes and production-ready designs while maintaining consistency across platforms and accessibility standards.
- Designed and launched Campendium's campsite booking platform from the ground up, creating a new revenue stream while delivering a seamless experience within the Campendium ecosystem.
- Redesigned interactive mapping experiences and data-rich overlays that helped campers interpret location-based information and make confident trip-planning decisions.
- Revitalized the property management system to improve operational efficiency and usability.
- Delivered user research insights that contributed to a 12.16% increase in quarterly objectives.

## Active911

**Sole Product Designer**, Remote | April 2020 - December 2021

- Owned end-to-end product design for a cross-platform emergency response product as the sole designer across native iOS, native Android, and web applications, partnering closely with product and engineering from discovery through launch.
- Designed map interactions, waypoint experiences, navigation workflows, and other critical user experiences that improved situational awareness and emergency response.
- Conducted user interviews and applied Jobs-to-Be-Done principles to shape product strategy, streamline workflows, and improve usability.
- Established and maintained a scalable design system, improving consistency and development efficiency across platforms.
- Designed and launched a new, paid scheduling product, driving company growth while empowering first responders to confidently manage staffing and shift schedules.
- Initiated research and concept development for a third product, laying the foundation for future expansion.

## Trip Pilot

**Sole Product Designer**, Bend, Oregon | May 2018 - April 2020

**UI/UX Design Intern**, Bend, Oregon | October 2017 - May 2018

- Promoted from UI/UX Design Intern to Sole Product Designer in six months, leading end-to-end product design for a group adventure planning app.
- Partnered directly with the CEO and developer to translate user research into product strategy, rapidly iterating from concept through launch.
- Reimagined the complex process of planning group outdoor adventures into intuitive, collaborative user flows that helped people spend less time coordinating and more time exploring.
- Designed map-based trip planning experiences, including interactive waypoint creation and location-aware features that simplified planning and navigation.
- Redesigned the application from scratch, creating a more cohesive user experience while improving development efficiency.
- Designed and launched the group checklist feature, achieving the highest free-to-paid conversion rate in the app's history.

## CiES (Contract)

**Sole Product Designer**, Bend, Oregon | July 2018 - February 2019

- Led the end-to-end design of the company's first digital product, translating complex aviation data into an intuitive aircraft fuel management application.

- Partnered closely with the CEO and developers to transform user and business requirements into a production-ready product through research, prototyping, and iterative testing.

## Giant Loop Moto

**Product Designer**, Bend, Oregon | September 2017 - May 2018

- Designed an off-road motorcycle tool roll that expanded the company's product line while complementing its existing gear ecosystem.
- Supported customer experience through direct customer service, gaining firsthand insight into user needs and product feedback.

**Product Design & Marketing Intern**, Bend, Oregon | May 2016 - September 2016

- Designed a retail merchandising display to improve in-store product visibility and customer engagement.
- Created web-based marketing assets supporting the company's digital presence and product launches.

## Education

**University of Montana**, Missoula, Montana | Expected May 2028

Master of Fine Arts, Game Design & Interactive Media

- Big Sky Game Design & Interactive Media Scholarship recipient
- 4.0 GPA

**University of Minnesota – Twin Cities**, Minneapolis, Minnesota | May 2017

Bachelor of Science, Individualized Studies

- Emphasis: Product Design, Cultural Anthropology, Sustainable Systems Management

## Certifications

[Figma UI UX Design Advanced](#), **Udemy**

[Product Psychology Masterclass](#), **Growth.Design**

[Design Accessibility](#), **Uxcel**

[How to Design for Accessibility: for UX Designers \(WCAG 2.2\)](#), **Udemy**

[W3C: Introduction to Web Accessibility](#), **edX**

[DESIGN RULES: Principles + Practices for Great UI Design](#), **Udemy**

## Skills & Expertise

- **Product Design:** End-to-end product design, UX strategy, interaction design, information architecture, rapid prototyping
- **Consumer Products:** Native iOS, Android, responsive web, cross-platform product design
- **Maps & Spatial Design:** Map-based experiences, location-aware interfaces, waypoint interactions, spatial UX
- **Research & Strategy:** User research, usability testing, Jobs-to-Be-Done, product strategy, systems thinking
- **Design Systems & Accessibility:** Design systems, visual design, WCAG 2.2, inclusive design
- **Information Architecture:** Complex workflow design, user flows, navigation systems, feature organization, scalable information structures
- **AI & Emerging Technologies:** AI-assisted workflows, generative AI, Unity, mixed reality
- **Tools:** Figma, FigJam, Jira, Confluence, Mixpanel, Lucidchart, Unity, Blender, Visual Studio Code
